

NOT LOGICAL.

The food and clothing of a Nevada miner and mechanic, necessary for himself and family, will cost him upon an average at least one hundred and fifty dollars per annum more under the McKinley than under the Mills bill, while the farmer's tools and supplies will cost him twice that sum per annum for the difference.—*Chronicle.*

Now, suppose, for the sake of argument that the above be true. The *Chronicle* has the proposition exactly reversed. It is not a question of what a miner's or a farmer's tools will sell for, but what his product will bring.

With silver at 1.20 the miner does not stop to count the cost of his pick and shovel; it is but an insignificant factor, but with silver at 85—as it was under the Cleveland administration—the miner must have very cheap tools if he mines at all.

So with the farmer. The price of what he has to sell rises with silver, and this fact has been recently demonstrated.

When wheat is seventy five cents a bushel, \$100 seems a big price for a McOrnick reaper, but with wheat at \$1.10 the price of the reaper does not enter into the farmer's calculation.

With the advancing price of silver, brought about by the Republican party, the produce of the miner and farmer rises hand in hand, and the protective tax on agricultural and mining implements becomes but an insignificant factor in the calculation.

It may furnish texts for Democratic editorials, but nothing more.

The Prospector.

These are auspicious times for the miner and prospector. For years they have labored alone and unaided, and their reports of strikes and rich finds have been received by capitalists with a coldness that has sent arctic chills running through the sturdy miner's anatomy and driven him back to his barren camp, there to commune with nature and curse the policy of a country that discriminated against the poor man and in favor of England and the Wall street broker. But it is a "long road that never turns," and after a long period of patient waiting the almost disheartened miner is on top again, and he is there to stay. From every camp in the West we hear the sound of pick and shovel, the reverberations of dynamite blasts and the rush and tear of the precious ore as it leaves the crand goes pell-mell into the ore house below. The prospector, who has with the greatest difficulty kept up the assessment work and maintained a precarious living for the last five or eight years, is now the coming millionaire, for he is having no difficulty in selling, bonding or leasing his claims. The world now looks brighter to him, and he begins to feel that his dream of independence and wealth is about to be realized—that the comforts and even luxuries that have been denied him so long are about to come to him. It is the beginning of a new world, a new life; and his prosperity means the growth and advancement of the best interests of the western slope, whose environments are marked with a silver belt. Long live the miner and prospector, and may his pathway up the mountain sides grow smoother and his "finds" richer until the whole fraternity meet with their just reward.—*Salt Lake Stock Exchange Journal.*

A strange malady has broken out among the telephone girls in New York. On the streets and in public places they burst out with: "hello, what number?" "all right," "busy." There is a species of this affliction in this city but the words are: "Hullo Charley," "ah there," and "stay there." It only breaks out after sunset.

Ambrose Bierce says: "We are cranks and every enlightened lunatic knows it."

A RARE OPPORTUNITY.

Good Agricultural Land for \$10 to \$20 per Acre.

The Pacific Improvement Company has recently purchased twelve thousand acres of land in the heart of Tehama County, for the purpose of promoting subdivision and settlement. This land is a large tract of agricultural land, to land of a large average quality, and is offered at a low price, and is divided into lots of 4, 8, 12, 16, 20 and 32 acres.

The terms upon which these lands are offered are especially attractive. They will be sold in subdivisions, as above indicated, by the payment of interest only for three years, at which time the purchaser can begin the payment of principal by paying the first of five equal annual installments. Thus a part of the principle is to be paid for three years and then the purchaser is to have five years in which to pay the balance of the principal.

Interest on the unpaid balance of the principal is to be paid at the rate of seven per cent per annum, making payments extending over a period of eight years. It is to be understood that this is an opportunity to purchase land of fair average quality at \$10 per acre, and good agricultural land at \$20 per acre, with other grades of land at prices to correspond with the above figures.

The assessment is frequently made that good land is available for settlement, and especially in California, for less than \$10 per acre. An examination of the land only at a distance will prove to the home seeker that this is an opportunity for the purchase of good agricultural land at \$10 an acre, and for quality grading down to fair agricultural land at \$10 an acre on terms of payment which should make the disposition of these lands to actual settlers a result easy of accomplishment.

The primary object of the purchase of this body of land was the breaking up of a large holding for the purpose of promoting its settlement in smaller quantities and its devotion to diligent husbandry.

For further particulars call upon, or address, WM. H. MILLS, Land Agent of the C. P. R. Co., Fourth and Townsend Streets, San Francisco, Cal. 125 tf
